

Product Roundup

Steel trash receptacles are durable and colorful

Anywhere people are, you have trash (drink cups, water bottles, food wrappers, pet waste). Pilot Rock steel receptacles have the durability to withstand constant exposure to the elements (both of man and nature). This expanded steel container from Pilot Rock comes in 32-, 52- and

55-gallon sizes, with your color choice of thermoplastic coatings. Select lids to collect trash or recyclables. Eight other steel receptacle designs are available to fit any landscape and to collect all kinds of trash (garbage, recyclables, smokers' waste). **R.J. THOMAS MFG. CO. INC.**, 800.762.5002, WWW.PILOTROCK.COM

Swimming pool safety signs

Introducing a new era in pool safety: signs that work together as a system to effectively warn. Clarion Safety Systems offers a pool safety sign product line that uses symbols, color, language, and repetition to communicate the most serious water safety warnings. Backed with comprehension-testing by industry experts to assure noticeability and understanding, and designed to comply with the latest standards, including best-practice ANSI and ISO formatting, the sign system allows you to better protect people and reduce risk at your pool. Select from the online catalog or let Clarion experts help build a system to fit your pool requirements. **CLARION SAFETY SYSTEMS**, 800.748.0241, WWW.CLARIONSAFETY.COM

Classic arched fountain

The Omega is the 11th pattern in the Otterbine 1HP-5HP Aerating Fountain line. The pattern incorporates eight nozzles to create a simple yet classic "arch" styled pattern. Producing spray dimensions as tall as 18 feet and as wide as 22 feet, the uniformity of the pattern creates a striking display. Combining the convenience of a floating fountain system with the intricacy of an architectural fountain, the Omega features truly interchangeable patterns, highest independently tested and published pumping and oxygen transfer rates in the industry, minimum operating depth of less than 30 inches, 1HP-5HP availability in both single and triple phase, and an all-inclusive five-year warranty.

Dinosaur-themed sandbox

Canadian sculptor Timothy P. Schmalz has created the first of its kind Digasaurus sandbox, which is educational, visually tasteful, and fun. The Digasaurus sandbox has many of the most popular dinosaurs, including some more recently discovered, and the down-

loadable full color 12-page field manual has a map of the bones with interesting facts about each dinosaur. With its lid closed, the Digasaurus appears like any large landscape stone. Manufactured in the USA out of highly durable, non-toxic LLPDE plastic, the Digasaurus looks like a big rock. **DIGASAURUS SANDBOX**, 888.777.6232, WWW.THEBESTSANDBOX.COM

Floating jungle gym

AquaSlide's completely redesigned Platinum Jungle Joe 2 features pyramid-shaped walls that offer a challenging climbing face on the exterior, while the interior has mesh floors that create splash zones for relaxing out of the sun and multi-level terraces for exploring. Jungle Joe 2 stands 12 feet high with options for sliding, climbing, jumping, and obstacle-type challenges for up to 10 guests. An integrated slide provides an exhilarating (yet safe) exit into the water. For even more fun, link the climber to other AquaSlide components. Jungle Joe 2 can contribute to the bottom line through event or party rentals and day pass sales. **COMMERCIAL RECREATION SPECIALISTS**, 877.896.8442, WWW.CRS4REC.COM
