

Clarion

DAVID GEFFEN HALL

Trip & Fall Protection

Management needed a way to protect against possible trips and falls of patrons in the balcony areas of this concert hall in NYC's Lincoln Center.

Creative Design

Clarion Safety found a warnings solution to help patrons quickly adapt their eyes to rapid lighting changes and recognize the hazard at hand.

Photoluminescent Stair Nosings

Fast-charging safety-grade photoluminescent stair nosings were produced and installed in one day, with our team working with the Center around its complex performance schedule.
