

## TRENCHLESS EQUIPMENT MANUFACTURERS FOR UNDERGROUND JOBS.

---

### DURABILITY

Labels were needed that could withstand practically every kind of outdoor environmental condition.

### ACCURACY

Standards-compliant label designs to accurately communicate all critical safety information was a must-have.

---

“

Working with Clarion Safety has made our life much easier," says TT's safety director Kevin P. Nagle. "In Clarion Safety we have **an excellent resource to aid our in-house hazard analysis team**. Initially, I thought it might be difficult to convey our **custom label needs** to an outside supplier. That's not the case with Clarion Safety. Their design team has proven that they can take our hand sketches and turn them into top-quality safety labels that meet our **unique durability requirements**.

”
