CLARION SAFETY SYSTEMS OFFERS RESOURCE FOR UNDERSTANDING CE, UKCA, AND UKNI MARK COMPLIANCE

Clarion Safety has developed and is offering a free, downloadable whitepaper for North American manufacturers to better understand European marking compliance.

Milford, PA – July 06, 2021 – Clarion Safety Systems, a leading manufacturer of safety labels, signs, and tags, has released a complimentary whitepaper detailing the intricacies of European marking compliance for North American manufacturers. This new and comprehensive guide contains information to help manufacturers comply with legislative requirements through visual safety communication practices, processes, and products.

"Manufacturers have a number of core responsibilities related to the products and equipment they produce. That includes designing safe items that comply with relevant regional regulations or legislation, such as those for product markings. For decades, manufacturers have been subject to the CE marking process for products on the market in Europe. With Brexit, and the introduction of UKCA and UKNI markings, that process has become much more complex. It's understandable that there's confusion around this transition, coupled with a sense of urgency due to there being six months left to implement changes," says Ron Crawford, CEO of Clarion Safety.

"Our mark compliance whitepaper is a reflection of the clear and concise guidance that Clarion Safety can provide to serve the product safety and compliance community. When it comes to CE, UKCA, and UKNI mark compliance, our Clarion Safety team is ready to assist, helping companies to take out any guesswork, lost time, or anxiety involved in meeting the new compliance marking requirements. We understand the importance of working with experienced, trusted consultants; after all, failure to meet the required marking standards can result in costly fines and even permanent shelving of products."

The Importance of a Product Compliance Strategy
Affixing a product with the correct CE, UKCA, and UKNI markings is a requirement for European directives and regulations. Non-compliant products result in lost time and money, and once exported, can be destroyed forever with no recovery options. The most important detail is ensuring accuracy before any products are ever sent out. Clarion Safety's whitepaper details the intricacies of compliance strategy and a company's steps towards developing one.

Reducing Risk, Protecting People

Key Topics for CE, UKCA and UKNI Compliance

Through their recently released whitepaper, Clarion Safety details the following key topics as they relate to manufacturers:

Section 1: The Depth of Brexit's Impact on Manufacturers

Section 2: Requirements for CE, UKCA, and UKNI Mark Compliance

Section 3: The Expert Analysis of a Compliance Strategy

Section 4: Risk Assessment Services for Equipment Manufacturers

These sections cover an in-depth analysis of the new marking compliance regulations, even expanding into specifications for the size, symbols and materials to use on marking labels.

Compliance Best Practices for Manufacturers

Clarion Safety's CE, UKCA and UKNI mark whitepaper was developed to go hand-in hand with their mark consulting that helps manufacturers ensure their product's smooth transition in conforming to new regulations. Services include identifying applicable directives and meeting their essential requirements, guidance in creating and maintaining technical documentation, and assistance with the respective European Union, United Kingdom, and Northern Ireland Declaration of Conformity processes.

In addition to its product marking/regulatory compliance consulting offerings, Clarion Safety Assessment provides full-service machine safety and liability prevention capabilities through a team of experts, each with specific areas of proficiency. When it first launched in 2020, Clarion Safety Assessment offered equipment manufacturers machine risk assessment services, warning and label reviews and product safety consulting. It continues to expand its portfolio in line with the needs of the OEMs that the company serves.
