WEBINAR ON OSHA/ANSI SAFETY SIGN SYSTEMS IN LINE WITH RISK MANAGEMENT AND ISO 45001 OBJECTIVES TO BE PRESENTED BY CLARION SAFETY SYSTEMS

Registration is now open for this learning opportunity on OSHA/ANSI workplace safety sign systems

Milford, PA – June 12, 2018 – [Clarion Safety Systems](http://www.clarionsafety.com), a leading designer and manufacturer of safety signs and safety labels, will be presenting a free webinar on workplace safety management systems, risk reduction, and safety signs.

The webinar, [“OSHA/ANSI Safety Sign Systems in Line with Risk Management and ISO 45001 Objectives,”](#) takes place Wednesday, June 20 at 2:00 PM Eastern Daylight Time. Clarion’s Derek Eversdyke, a member of the U.S. technical advisory group to ISO 45001 and a presenter at the American Society of Safety Professional’s (ASSP) recent Safety 2018 Professional Development Conference, will discuss recent advances in U.S. and international safety sign-related standards to communicate and reduce risk in line with a management systems approach to safety.

Companies adopting ISO 45001, or implementing a systems approach to safety, need to accurately communicate residual risks to workers. OSHA and ANSI compliant safety sign systems are a key component in communicating about hazards and mitigating risk. Without an effective safety management program in place – one that emphasizes best practice safety signs to reinforce safe behavior – the lives of workers, subcontractors and visitors could be at risk.

In the webinar, participants will learn:

- How to use the latest standards-based advances in formatting safety signs to achieve ISO 45001 management system objectives
- To document a facility’s safety sign system, before and after improvements have been made in line with ISO 45001 or a management systems approach to safety
- Differences (and previous conflicts) between OSHA’s sign regulations and the ANSI standards
- How to update signage in line with OSHA’s compliance requirements and today’s ANSI best practices
- And much more!

FREE WEBINAR: OSHA/ANSI SIGN SYSTEMS IN LINE WITH ISO 45001 OBJECTIVES

EVENT DATE: June 20, 2018 at 2:00 PM Eastern Daylight Time

PRESENTER: Derek Eversdyke, Clarion Safety Systems

ABOUT DEREK EVERS DYKE

In his role as Director of Business Development at Clarion Safety Systems, Eversdyke collaborates with safety professionals on sign systems that can help to elevate safety and minimize risk. He has worked with Clarion's product manufacturing and facility safety customers – as well as industry partners and advocates – for nearly a decade. As a member of the U.S. technical advisory group (TAG) to ISO 45001, Eversdyke is involved in the standards' multi-year development and refinement process.

ABOUT CLARION SAFETY SYSTEMS

Clarion Safety Systems, LLC, is the leading designer and manufacturer of visual safety solutions that help customers in more than 180 industries worldwide to make their products and premises safer. Clarion offers a full range of standard and custom products including machinery safety labels, environmental and facility safety signs, pipe and valve identification markings, lockout/tagout products, and safety-grade photoluminescent egress path-marking escape systems. Founded in 1990, the company continues to play a leading role in the development and writing of international and national standards for safety signs, labels, and markings. Clarion is headquartered at 190 Old Milford Road in Milford, PA, 18337, and online at www.clarionsafety.com.
