CLARION SAFETY SYSTEMS' EXPERT IS A FEATURED INSTRUCTOR AT THE UNIVERSITY OF WISCONSIN'S COURSE ON PRODUCT SAFETY, LIABILITY AND WARNINGS

Angela Lambert, head of standards compliance for Clarion Safety Systems, will be part of the University of Wisconsin's annual course on using warnings and instructions to increase safety and reduce liability

Milford, PA – May 4, 2021 – The University of Wisconsin-Madison's annual product safety, liability and warnings course will feature a session from Angela Lambert, a safety and liability industry expert from Clarion Safety Systems. Clarion Safety is a leading designer and manufacturer of [safety labels](#), [signs](#) and [tags](#) – and provides complementary services for comprehensive [machine safety, compliance and risk reduction](#).

Lambert's session on warnings and instructions is part of the university's 'Advanced Products' course offered through its College of Engineering – Engineering Professional Development department, and takes place May 17 to 20, 2021.

"Failure to warn" and "inadequate warnings" top [product liability](#) allegations. Lambert will present considerations on creating effective warnings for both domestic and export markets. That will include information on key standards for safety labels in the U.S. and internationally (focusing on ANSI Z535.4, ISO 3864-2 and the EU Machinery Directive), label content elements and label material/durability requirements. Her session also includes a team-based workshop designed to help participants analyze warnings using today's standards and best practices.

At Clarion Safety, Lambert heads the company's standards compliance initiatives. She has more than fifteen years of experience in the safety and manufacturing industry, helping product safety engineers solve their warnings and liability challenges. Lambert is actively involved at the leadership level in the ANSI and ISO standards. She's chair of ANSI Z535.1, the standard that focuses on colors used in visual safety communication, as well as a delegate representative to ANSI for the ISO/TC 145 SC2 WG 1 committee, responsible for the library of ISO 7010 registered symbols and the ISO 3864 set of standards.

Rather than the traditional in-person conference, this year's event will be virtual to protect the health of attendees and presenters during the COVID-19 pandemic. The four-day course centers around current and emerging safety, warnings and instructions best practices from experienced product safety

Reducing Risk, Protecting People

management professionals including consulting engineers, product safety standards experts, and a defense attorney.

The course is geared toward industrial and commercial equipment manufacturers along with companies who insure them. Course participants are typically safety and design engineers but also include writers of warnings and safety literature, liability and product managers, in-house counsel and outside experts. Other topics to be covered at this year's conference will include legal responsibility and duty to warn/instruct, writing and designing manuals and warnings and evaluating warnings and instructions.

To learn more about the conference, including earning credit hours for the course (CEU and PDH) as well as how to register, [visit the University of Wisconsin's website](#). Please enroll by May 12.

[Contact Clarion Safety](#) to learn more about the company's industry experts and opportunities for collaboration on media and educational projects.

ABOUT UNIVERSITY OF WISCONSIN-MADISON COLLEGE OF ENGINEERING

The University of Wisconsin–Madison College of Engineering is a top-ranked engineering school of the University of Wisconsin–Madison, one of the leading research universities in the world. The college comprises 13 academic departments and dates back to 1857.

ABOUT CLARION SAFETY SYSTEMS

Clarion Safety Systems, LLC, is the leading designer and manufacturer of visual safety solutions that help customers in more than 180 industries worldwide to make their products and premises safer. Clarion Safety offers a full range of standard and custom products including machinery safety labels, environmental and facility safety signs, pipe and valve identification markings, lockout/tagout products, and safety-grade photoluminescent egress path-marking escape systems. The company also provides complementary services for comprehensive machine safety, compliance and risk reduction. Founded in 1990, Clarion Safety continues to play a leading role in the development and writing of international and national standards for safety signs, labels, and markings. It is headquartered at 190 Old Milford Road in Milford, PA, 18337, and online at <http://www.clarionsafety.com>.
