**CLARION SAFETY SYSTEMS EXPANDS PRODUCT LINE TO OFFER NEW SAFETY SIGNS TO MEET OSHA COMPLIANCE REQUIREMENTS**

*Clarion Safety has expanded its workplace safety product line with over 100 new sign designs to help customers meet safety objectives and compliance requirements*

**Milford, PA – October 4, 2018** – Clarion Safety Systems, a leading designer and manufacturer of [safety signs](#), [safety labels](#) and [safety tags](#), has expanded its safety sign product line to help its clients meet their safety objectives and the Occupational Safety and Health Administration's (OSHA) compliance requirements.

"Earlier this year, we added a new section to our online workplace safety sign catalog specifically dedicated to meeting OSHA safety sign requirements and compliance needs," says Ron Crawford, CEO of Clarion Safety Systems. "With this next phase of that initiative, we've significantly expanded our OSHA product line to meet our customers' needs while continuing to support the utilization of best practices regardless of which relevant set of standards they elect to pursue."

OSHA has many rules and regulations that must be followed in the United States as part of the organization's monitoring and enforcement of workplace safety – and this includes requirements for safety signs. In its *Specifications for Accident Prevention Signs and Tags*, 29 Code of Federal Regulation (CFR) 1910.145, OSHA provides sign requirements, specifying that signs must be put in place "to indicate and define specific hazards."

"As part of our commitment to providing the signs needed to help our customers achieve their workplace safety, quality and efficiency objectives, we've significantly expanded our product line – all while offering our trademark world-class service, fast turnarounds and favorable price points."

Clarion has added over 100 new safety sign designs to its product offering. Signs are offered in stock for immediate ordering.

Clarion specializes in designing safety signs that are not only compliant with OSHA, but use the latest ANSI and ISO warnings guidelines. For nearly every OSHA-style safety sign in stock, Clarion offers an [ANSI Z535-style safety sign](#) best practice recommendation. These best practice recommendation offer additional, critical detail to help keep workers safe, as they contain the latest criteria for state-of-the-art warnings.

Clarion's new [safety signs to meet OSHA compliance](#) can be found in the company's online catalog at ClarionSafety.com. In addition to its sign product line the company offers services like customization and free assessments, where Clarion's professionals assess and make recommendations for a facility's current signage and communication challenges.

#### **ABOUT CLARION SAFETY SYSTEMS**

Clarion Safety Systems is a worldwide leader in product and workplace safety communication. Clarion Safety designs and produces product safety labels and facility safety signs and tags – along with offering complementary solutions and services like safety and risk assessments – needed to reduce risk and protect people. The company also provides a wide range of printing services outside of the safety realm, addressing identification, branding, dataplates, serialization and more, to add value for its customers. With 30 years of safety standards leadership, Clarion Safety has unparalleled knowledge of national and international best practices and codes to meet specific regulatory requirements, from OSHA, ANSI and ISO to WEEE, RoHS and REACH. Its corporate headquarters and state-of-the-art production facility are located in Milford, PA, and products are made in the U.S.A. The company is a registered ISO 9001:2015 manufacturer and offers top 3M materials. For more information, [visit www.clarionsafety.com](http://www.clarionsafety.com).
