AS A SAFETY PARTNER OF THE ROBOTIC INDUSTRIES ASSOCIATION, CLARION SAFETY SYSTEMS TO PARTICIPATE IN NATIONAL ROBOT SAFETY CONFERENCE

Clarion Safety Systems will be exhibiting at the Robotic Industries Association's National Robot Safety Conference, held October 17-19 in Cincinnati, Ohio

Milford, PA – October 13, 2016 – [Clarion Safety Systems](#), a leading designer and manufacturer of safety labels and safety signs, will be participating in the National Robot Safety Conference, taking place October 17-19 in Cincinnati, Ohio.

The National Robot Safety Conference is hosted by the [Robotic Industries Association \(RIA\)](#), a group that Clarion has recently begun working with to help promote best practices and share industry expertise. RIA drives innovation, growth, and safety in manufacturing and service industries through education, promotion, and advancement of robotics, related automation technologies, and companies delivering integrated solutions. Its National Robot Safety Conference will offer sessions and workshops that examine key issues in robot safety and provide an in-depth overview of current industry standards.

Clarion will be [exhibiting at the show](#), sharing resources on today's best practices for safety label and safety sign systems.

"Our current customers in the robotics and automation industries value Clarion's ANSI and ISO-compliant equipment product safety labels and facility safety signs. But we know that many [safety labels](#) and [safety signs](#) in use today are based on old, outdated standards," says Angela Lambert, Director of Sales, Marketing and Standards Compliance at Clarion.

"We hope to help promote a better understanding of the importance of using the design principles from the latest versions of the ANSI and ISO standards, as well as the value of uniformly using those best practices – whether it's safety labels from component to component, or safety labels on machines working in tandem with safety signs placed nearby."

Safety labels and safety signs play a critical role in communicating safety and hazard information on products and machinery, and in workplaces. Compliant with the latest OSHA, ANSI and ISO standards, Clarion's best practice safety label and safety sign systems can help to protect people from injury or death, decrease the potential for costly lawsuits and prevent issues related to non-compliance with both national and international standards.

Reducing Risk, Protecting People

“For almost 30 years, Clarion has been helping product manufacturers to create legally ‘adequate’ warnings that use the latest standards-based criteria. Now that the [OSHA and ANSI standards](#) for facility safety signs have evolved to include the same design principles that govern product safety labels, it’s time to update safety signs. Clarion’s OSHA/ANSI Z535-compliant signs take advantage of our extensive experience designing safety label systems for equipment manufacturers – and our longstanding leadership on the ANSI and ISO committees that write the national and international standards in this field.”

Clarion’s safety label and safety sign systems are state-of-the-art; they incorporate the most advanced symbols, color-coding and formatting principles. They also focus on uniformity between the safety labels found on products and safety signs in facilities. When it comes to warnings, this consistency means familiarity and increased comprehension, all of which are part of effective safety communication.

“Robot safety is at the forefront of automation planning. We look forward to talking with engineers, robot system integrators, technicians and other manufacturing automation professionals to learn about their work and the ways Clarion expertise can help to increase safety and reduce risk. We’re excited to work together to help to keep people safe from harm.”

For more information on Clarion’s safety label and safety sign systems, visit Clarion’s website or call 800-748-0241.

ABOUT CLARION SAFETY SYSTEMS

Clarion Safety Systems, LLC, is the leading designer and manufacturer of visual safety solutions that help customers in more than 180 industries worldwide to make their products and premises safer. Clarion offers a full range of standard and custom products including machinery safety labels, environmental and facility safety signs, pipe and valve identification markings, lockout/tagout products, and safety-grade photoluminescent egress path-marking escape systems. Founded in 1990, the company continues to play a leading role in the development and writing of international and national standards for safety signs, labels, and markings. Clarion is headquartered at 190 Old Milford Road in Milford, PA, 18337, and online at www.clarionsafety.com.
